

Convenient and compact roll size.

The five distinct colors of GaffTac™ Spike Tape make it easy for actors, technicians, stage managers and directors to quickly distinguish set locations and marks on stage. GaffTac™ Spike Tape offers the perfect trio of benefits expected — comfortable unwind strength for fast lay down in the rehearsal hall or theatre; excellent adhesion to resist peeling under the heavy traffic of actors and set pieces; and of course, clean removal during strike.

Available in White, Red, Yellow, Blue, and Fluorescent Green, Rosco GaffTac™ Spike Tape is manufactured using a premium quality polyethylene coated cloth laminate with a natural rubber based adhesive. This unique adhesive offers high tack with excellent adhesion yet still removes cleanly without leaving behind any sticky residue. It's also easily tearable, which means no need for cutting tools. The fine mesh weave of the cloth laminate base is resistant to edge fraying and offers a smooth, matte surface with minimal sheen. In addition, the supple fabric base conforms well to irregular surfaces to insure a good bond on a variety of surfaces.

Features:

- Industrial grade polyethylene cloth laminate
- Natural rubber adhesive
- Supple 11.8 mil base
- Available in White, Red, Yellow, Blue, and Fluorescent Green

Benefits:

- Durable yet easy to tear for quick application
- Strong bond to many common materials that resists peeling during rehearsals and performance runs
- Clean removal with no residue on most surfaces
- Conforms to odd shaped and irregular surfaces
- Excellent water, vapor and abrasion resistance
- Convenient 25m roll fits easily in stage manager kits

PRODUCT INFORMATION

Put up	Single Roll Case of 96rolls
Sizes	1/2in x 27yds (12mm x 25m)
Colors	White, Red, Yellow, Blue, and Fluorescent Green

SPECIFICATIONS

Backing	Polyethylene cloth laminate 73 Mesh
Adhesive	Natural Rubber
Finished Thickness	11.8 mil +/- 0.4 mils (300 um)
Peel Adhesion	29 oz. / inch
Roll Unwind Force	39 oz. / inch
Tensile Strength	36 lbs per inch
Temperature Resistance	-31° F to 176° F (-35°C to 80°C)
