

LitePad HO90 is Rosco's revolutionary, edge-lit LED source that lighting professionals use for accent and fill lighting – now featuring a high CRI output. At only 0.3" (8mm) thick, LitePad HO90 is able to fit in places where conventional light sources will not. LitePad HO90 is daylight balanced (5300K), features High CRI (90+) emitters and produces a soft, flattering quality of light that is easy on the eyes. Available in six standard sizes, LitePad HO90 has LEDs on all four sides of the perimeter for maximum brightness, while an interior connector provides a solid power connection directly on the LitePad itself. LitePad HO90 is the perfect solution for lighting night-time car interiors, adding a glow to scenery or props, or any situation that needs extra illumination without space for a traditional fixture.
